Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 39 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schader RE 37,127.

Schader discloses a drill bit having a cutter cone. The cone is mounted to the end of the body and has a number of teeth thereon. The teeth include an inner row and a gage row. The teeth have a layer of hardfacing. The hardfacing includes steel and a filler. The filler is provided in the range of 50 to 80 per cent weight and about 12 to 18 per cent weigh cast tungsten carbide. The claim calls for 20 to 100 per cent weight spherical carbide. Applicant's specification sets forth the range being 10 to 100 per cent weigh spherical carbide with no criticality of the lower limit of 20 per cent being set forth. It would have been considered an obvious design choice to increase about 18 per cent to 20 per cent since about 18 per cent is considered to be close enough to 20 per cent for one of ordinary skill in the art to increase the percentage to 20 since no criticality of 20 per cent has been shown.

Claim 42 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-3,7-29,31-33,35-37,40 and 41 are allowed.

Response to Arguments

Applicant's arguments filed 12/12/05 have been fully considered but they are not persuasive. Applicant argues that about 12 to about 18 percent does not render 20 per cent obvious. Since no criticality of 20 per cent has been set forth, about 18 is considered to render 20 per cent obvious.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
